The sprouting world.

A calm, solid planet with a lifted right leaf and a gently tilted orbit. This guide covers Step 2 only.

worldling

19 degrees

Orbit rises to the right.

22 units

Thinner, uniform ring weight.

12 units

Even gap on each side of the front ring.

15% more area

Right leaf is slightly larger and lifted.

One shape. Every setting.

Use the horizontal lockup by default. Choose the stacked version when the layout is narrow or centered.

PRIMARY / DARK

PRIMARY / LIGHT

STACKED / DARK

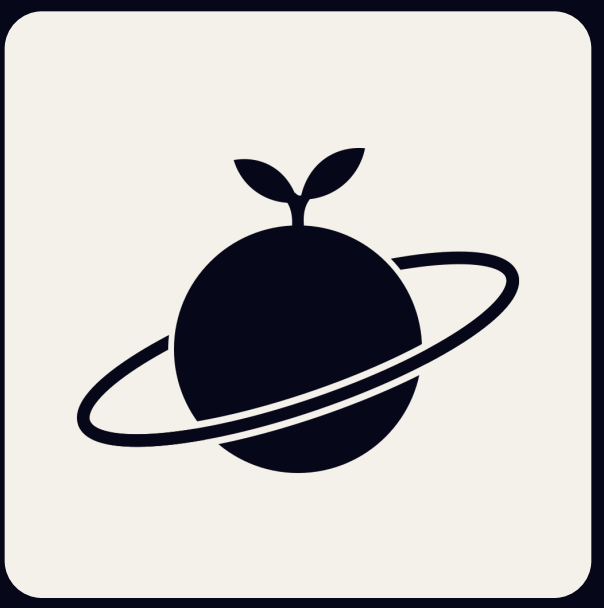

STACKED / LIGHT

Keep the core single color.

Starlight on Void is the everyday expression. White and dark transparent files work across approved neutral backgrounds.

WHITE

DARK

PRIMARY COLOR

FULL COLOR / HERO ONLY

The Nebula-to-Aurora gradient is reserved for large hero moments. Keep the wordmark solid. Do not use the gradient for a favicon.

APP ICON / 1024 x 1024

A centered Starlight mark sits over a muted purple-to-teal background. Corner radius: 224px. A square background source is also included.

Small, with care.

The native-size PNG and HTML proof in the pack preserve the exact 1024px, 64px, 32px and 16px exports.

A little world, at every size.

The 32px and 16px favicons use optical corrections to preserve the ring and sprout.

1024px source, displayed at 520px

3x pixel enlargement	6x pixel enlargement	12x pixel enlargement
Master	Optical favicon	Optical favicon

OPTICAL VERSIONS

At 32px and 16px, a direct reduction makes the orbit too faint. The optical variants keep the same planet, leaf paths and 19 degree angle, while strengthening the ring, opening the gap and slightly enlarging the sprout.

Version	Ring / gap	Sprout	Canvas / crop
Master	22 / 12 units	100%	0 0 1024 1024
32px	30 / 22 units	104%	80 80 864 864
16px	48 / 34 units	112%	80 80 864 864

Checked as native raster pixels and with nearest-neighbor enlargements. At 16px, the sprout reads as a two-leaf silhouette; its subtle asymmetry is mainly visible at larger sizes.

Give the mark room.

Keep the silhouette clean, with one quiet background and no added decoration.

Give the world room.

Clear space x = one quarter of the planet diameter.

Measure from the outermost visible edge. Apply the same rule around a complete lockup.

MINIMUM SIZES

Master mark	Horizontal	Stacked	Hero gradient
48px wide	160px wide	128px wide	128px wide

The 16px and 32px files are dedicated exceptions. Clear space is x = 108 master units, or one quarter of the planet diameter. Apply x around the outermost edges of the whole lockup; internal mark-to-word spacing is already fixed.

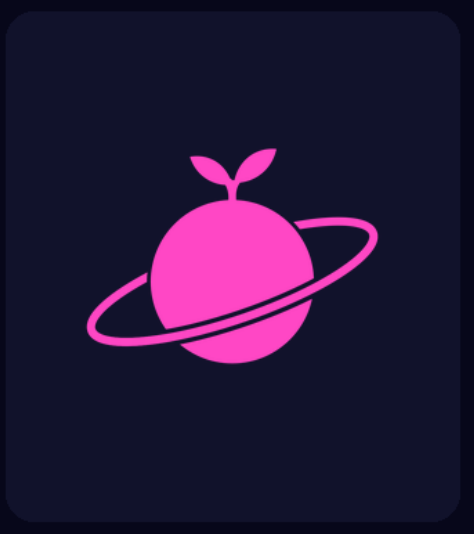

Keep these outside margins even when the artwork file itself has less padding. Add clear space in the surrounding layout, not by changing the logo proportions.

Let the shape do the work.

Keep the geometry and approved fills intact. The logo already has all the detail it needs.

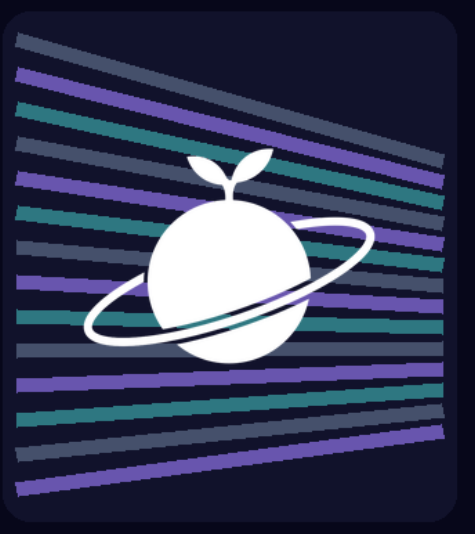

Do not stretch

Do not recolor

Do not add effects

Avoid busy backgrounds

Do not stretch

Keep the original proportions and the fixed angle. Do not rotate the complete lockup.

Do not recolor

Use the supplied neutral or primary-color versions. Keep the gradient for large hero use.

Do not add effects

No shadow, glow, bevel, 3D treatment or extra outline around the complete mark.

Avoid busy backgrounds

Use a quiet solid area with clear contrast and the specified outside clear space.

Simple geometry. Exact files.

All logo SVGs contain vector geometry and outlined lettering. The transparent gap is a knockout, so it works on any permitted background.

CORE MARK

Master artboard: 1024 x 1024. Planet: center (512, 590), radius 216. Orbit: center (512, 590), radii (394, 100), SVG rotation -19 degrees, stroke 22. Front knockout: stroke 46, producing 12 units of clear space on either side. Rear clearance: radius 226.

SPROUT

The left leaf, right leaf and stem are three filled Bezier paths. The right leaf has about 15% more area, with its tip raised about 21 units. Exact coordinates are in worldling-geometry.json and REBUILD.md.

WORDMARK

Lowercase worldling. Bricolage Grotesque: weight 650, width 100, optical size 48. Nominal em: 200 units. Tracking: -5 units. Kerning is frozen into the outlined paths. Same-color 0.8-unit stroke with round joins softly rounds the outline.

HORIZONTAL LOCKUP

Artboard: 1331 x 360. Mark transform: translate(0, -14.56), then scale(0.38). Wordmark visible top-left: (440, 90.5430). Wordmark scale: 1.

STACKED LOCKUP

Artboard: 800 x 720. Mark transform: translate(92.8, -48), then scale(0.6). Wordmark visible top-left: (100, 505). Scale wordmark to a visible width of 600 units.

APP ICON

Artboard: 1024 x 1024. Background corner radius: 224. Mark transform: translate(71.68, 71.68), then scale(0.86). Background gradient: #30275A at 0%, #202544 at 56%, #1B484B at 100%, running from bottom-left to top-right.

COLOR VARIANTS

The core shape and proportions do not change. White: #FFFFFF. Dark: #07071A. Starlight: #F4F1EA. Primary color: #7C6CFF. Hero gradient: #7C6CFF to #3FE0C5, from (160, 790) to (864, 250).

Font source: github.com/ateliertriay/bricolage. Original variable fonts and their OFL license files are included. The production SVGs do not need fonts installed.
