Grow a world of your own.

Visit everyone else's.

A little wonder in the headlines. A calm rhythm everywhere else. Three familiar roles give Worldling a warm, clear voice in English and French.

DISPLAY AND HEADINGS

Bricolage Grotesque

600 and 650 / width 100% / optical sizing auto

Distinctive shapes make large moments feel warm and crafted.

BODY AND INTERFACE

Geist

400, 500 and 600 / sentence case

A quiet companion for reading, navigation and everyday controls.

COUNTERS AND TIMESTAMPS

Geist Mono

500 / lining, tabular numbers

Even widths keep changing values steady. Use it sparingly.

40 to 72px	16 to 18px	360 to 1440px	EN + FR
Display	Body	Fluid viewport range	Accents intact

A fluid scale, with clear roles.

Mobile: 360 CSS px. Desktop: 1440 CSS px. Sizes below assume the default 16px browser root and interpolate smoothly between the two widths.

STYLE	FAMILY	MOBILE	DESKTOP	LINE HEIGHT	TRACKING	WEIGHT
Display	Bricolage	40px	72px	1.05	-0.035em	650
H1	Bricolage	36px	56px	1.1	-0.03em	650
H2	Bricolage	28px	40px	1.15	-0.025em	650
H3	Bricolage	24px	30px	1.2	-0.02em	600
H4	Geist	20px	24px	1.3	-0.01em	600
Body large	Geist	18px	20px	1.6	0em	400
Body	Geist	16px	18px	1.6	0em	400
Small	Geist	14px	16px	1.5	0em	400
Caption	Geist	12px	14px	1.45	0.01em	500

Line heights are unitless, so they grow with the text. Tracking uses em. Keep 100% width for Bricolage and allow natural wrapping instead of condensing a heading.

EVERYDAY UI STYLES

STYLE	FAMILY	SIZE	WEIGHT	LINE HEIGHT	TRACKING
Button	Geist	16px	600	1.25	0
Form label	Geist	14px	500	1.4	0
Input	Geist	16px	400	1.5	0
Data value	Geist Mono	24 to 32px	500	1.15	0
Timestamp	Geist Mono	12 to 14px	500	1.4	0

Small details. Room for wonder.

Desktop size relationships shown below. H4 switches to Geist to keep compact panels and controls calm.

Display 72px / 650	Small wonders.
H1 56px / 650	Your own world
H2 40px / 650	Room to grow.
H3 30px / 600	Every visit matters
H4 24px / 600	A gentle beginning
Body large 20px / 400	Make room for something good.
Body 18px / 400	Your world grows with every visit.
Small 16px / 400	A little more life, every day.
Caption 14px / 500	A quiet detail, when you need it.

One visual voice, in two languages.

Both examples use the same mobile type relationships: Bricolage H2, Geist body large and body, and a Geist 600 action label.

ENGLISH

Grow a world of your own.

Visit everyone else's.

Choose a landscape, add a little color, and let your world bloom. Every visit brings a little more life.

Create my world

Typography specimen

FRANÇAIS

Fais grandir ton propre monde.

Explore celui des autres.

Choisis un paysage, ajoute une touche de couleur et laisse ton monde s’épanouir. Chaque visite lui donne un peu plus de vie.

Créer mon monde

Spécimen typographique

HEADLINE / BODY / ACTION

The expressive headline gives the message character. Unembellished body copy makes it easy to read. A clear action label keeps the next step obvious.

Bricolage 650	Geist 400	Geist 600
H2 / 28px / 1.15	Body / 16px / 1.6	Button / 16px / 1.25

French copy is a proposed informal tu-form treatment for this specimen. Final translations and voice guidance follow in Step 7.

Let names and numbers breathe.

Keep accents and punctuation intact. Use the correct language setting, allow longer translations to wrap and preserve locale-aware number formatting.

WORLD HEADER / FRANÇAIS

Éclats d’aurore

par @mira

Ton monde s’épanouit.

07	1 248	32
Niveau	Visites	Comètes

Envoyer une comète

Bricolage for the world name.
Geist for the words.
Geist Mono for separate values.

Keep a comfortable measure

Aim for 50 to 65ch on wide layouts. Let copy fill the available mobile width.

Allow more than one line

Long names and translated labels wrap. Avoid fixed-height text boxes.

Reserve small text

Use captions for extra detail. Keep instructions, errors and actions at body or UI size.

Keep words in Geist

A number inside a sentence stays in the body font. Mono is for separate data.

FRENCH GLYPH PROOF

À Â Æ Ç É È Ê Ë Î Ï Ô Œ Ù Û Ü Ÿ

à â æ ç é è ê ë î ï ô œ ù û ü ÿ

« Un monde à découvrir. »

The bundled Geist files use fallback for the narrow no-break space (U+202F). Keep it in locale-formatted values; do not remove the grouping space.

Ready to use, with room to grow.

The kit includes variable fonts, type specifications, reusable CSS and an editable local specimen. The full reference lives beside this guide as Markdown.

FLUID SIZING

Use rem bounds and a rem + vw middle value. Keep the browser root at its default 100%, so user font preferences can affect the scale.

```
/* Display: 40px to 72px at the reference widths */
font-size: clamp(2.5rem,
  calc(1.833333rem + 2.962963vw), 4.5rem);
```

FONT SETTINGS

Bricolage: width 100%, optical sizing auto. Geist: 400 for reading, 500 for labels, 600 for actions. Geist Mono: 500 with tabular lining figures. Use the approved outlined logo from Step 2 for the wordmark.

FILES TO START WITH

02-type-files	CSS classes, font-face declarations and JSON specs.
03-fonts	Variable TTF, web WOFF2 and original OFL notices.
04-previews	PNG reference sheets and a local HTML specimen.
05-source	Font coverage and a reproducible type-scale audit.

CHECKS AND LIMITS

Font coverage and CSS size endpoints are checked. PDF specimens are visually reviewed. Browser zoom, reflow and user text-spacing behavior must be verified in the implemented app. This guide does not certify the app’s accessibility.
