A little world, ready to share.

The approved logo, calm space and one living world connect every application.

A WORLD TO VISIT

Éclats d'aurore

@mira

Grow a world of your own.

Visit everyone else's.

X HEADER / 1500 x 500

worldling

Grow a world of your own.

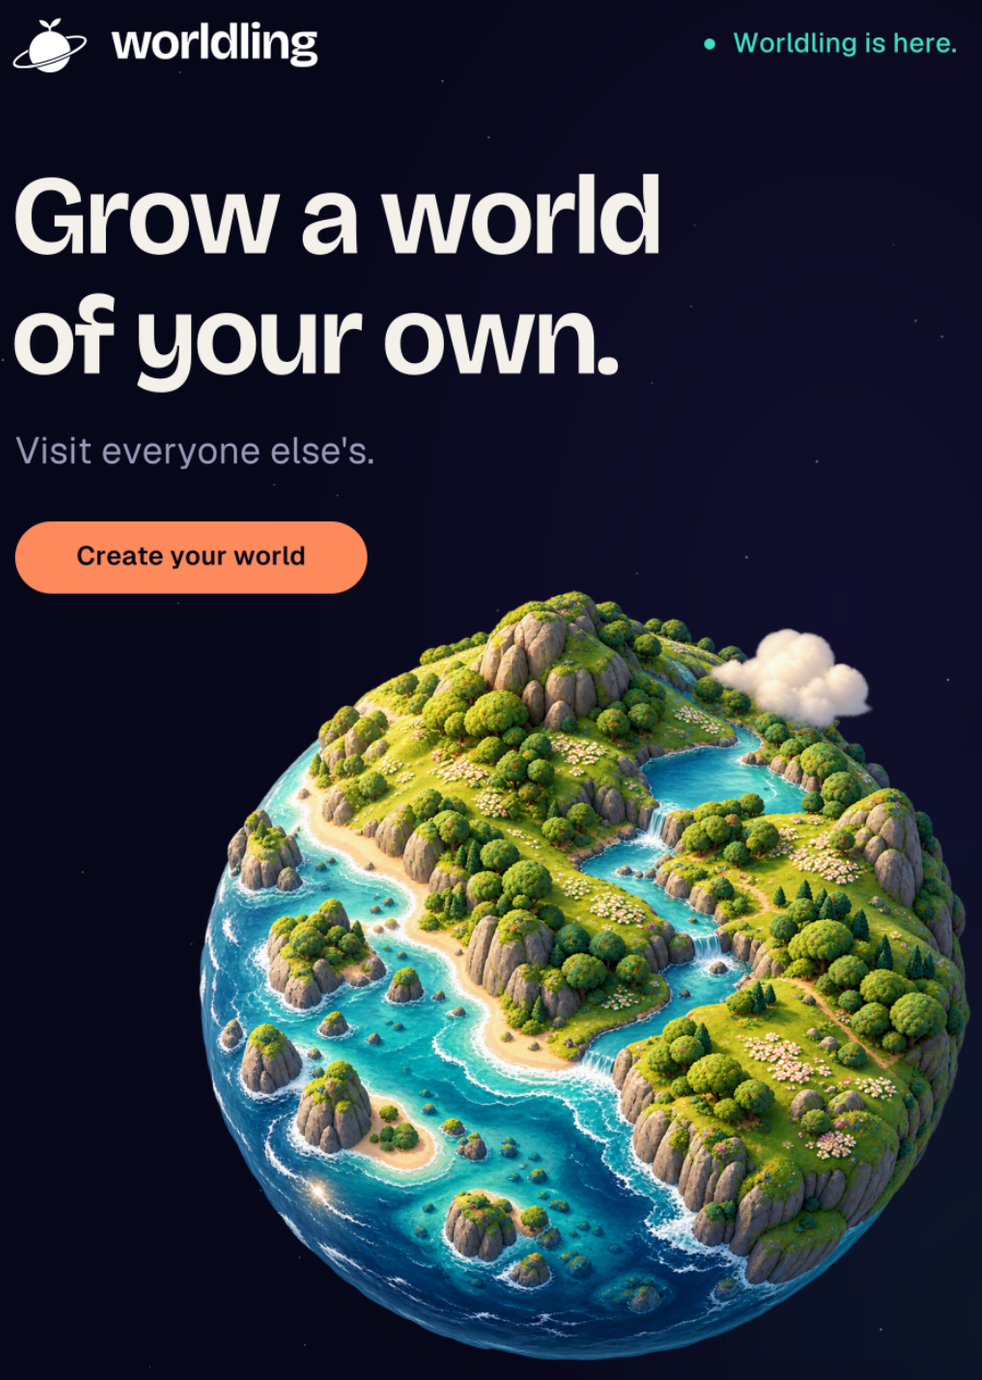

Visit everyone else's.

Worldling is here.

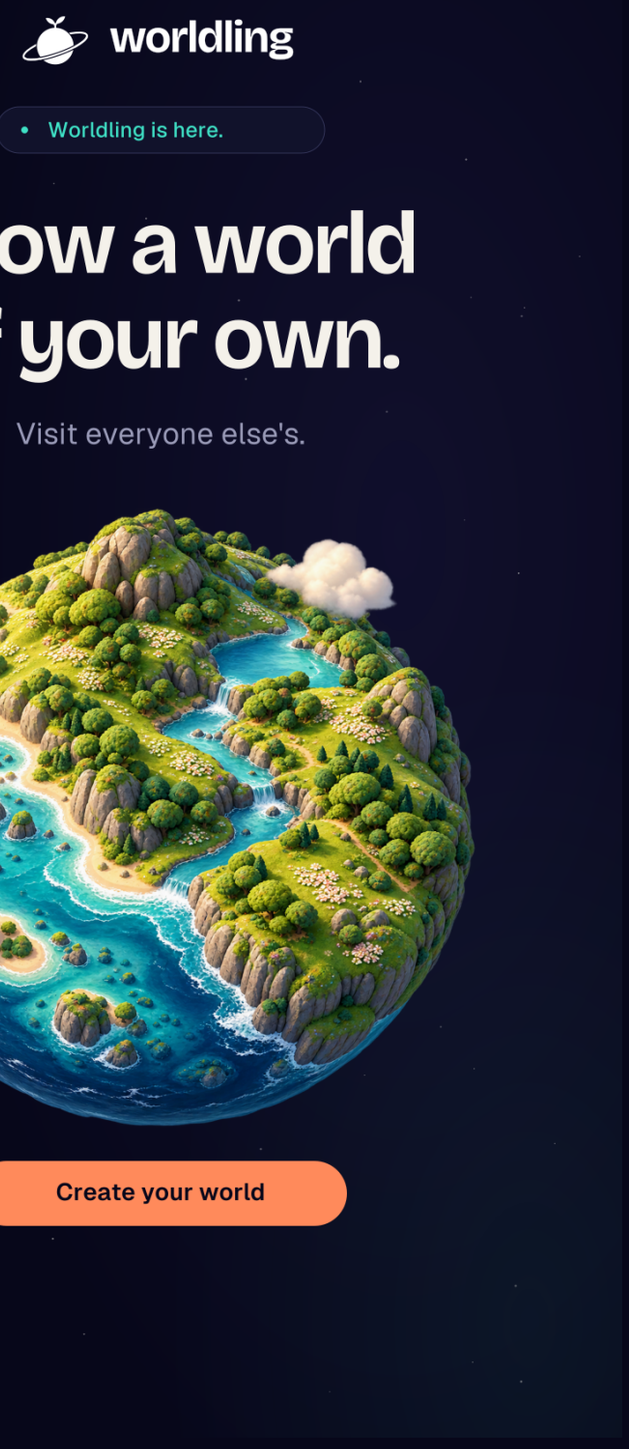

A clear invitation, warm action color and plenty of room around the planet.

INSTAGRAM POST / 1080 x 1350

The post leads with the original tagline. The planet fills the lower half while retaining its complete silhouette.

INSTAGRAM STORY / 1080 x 1920

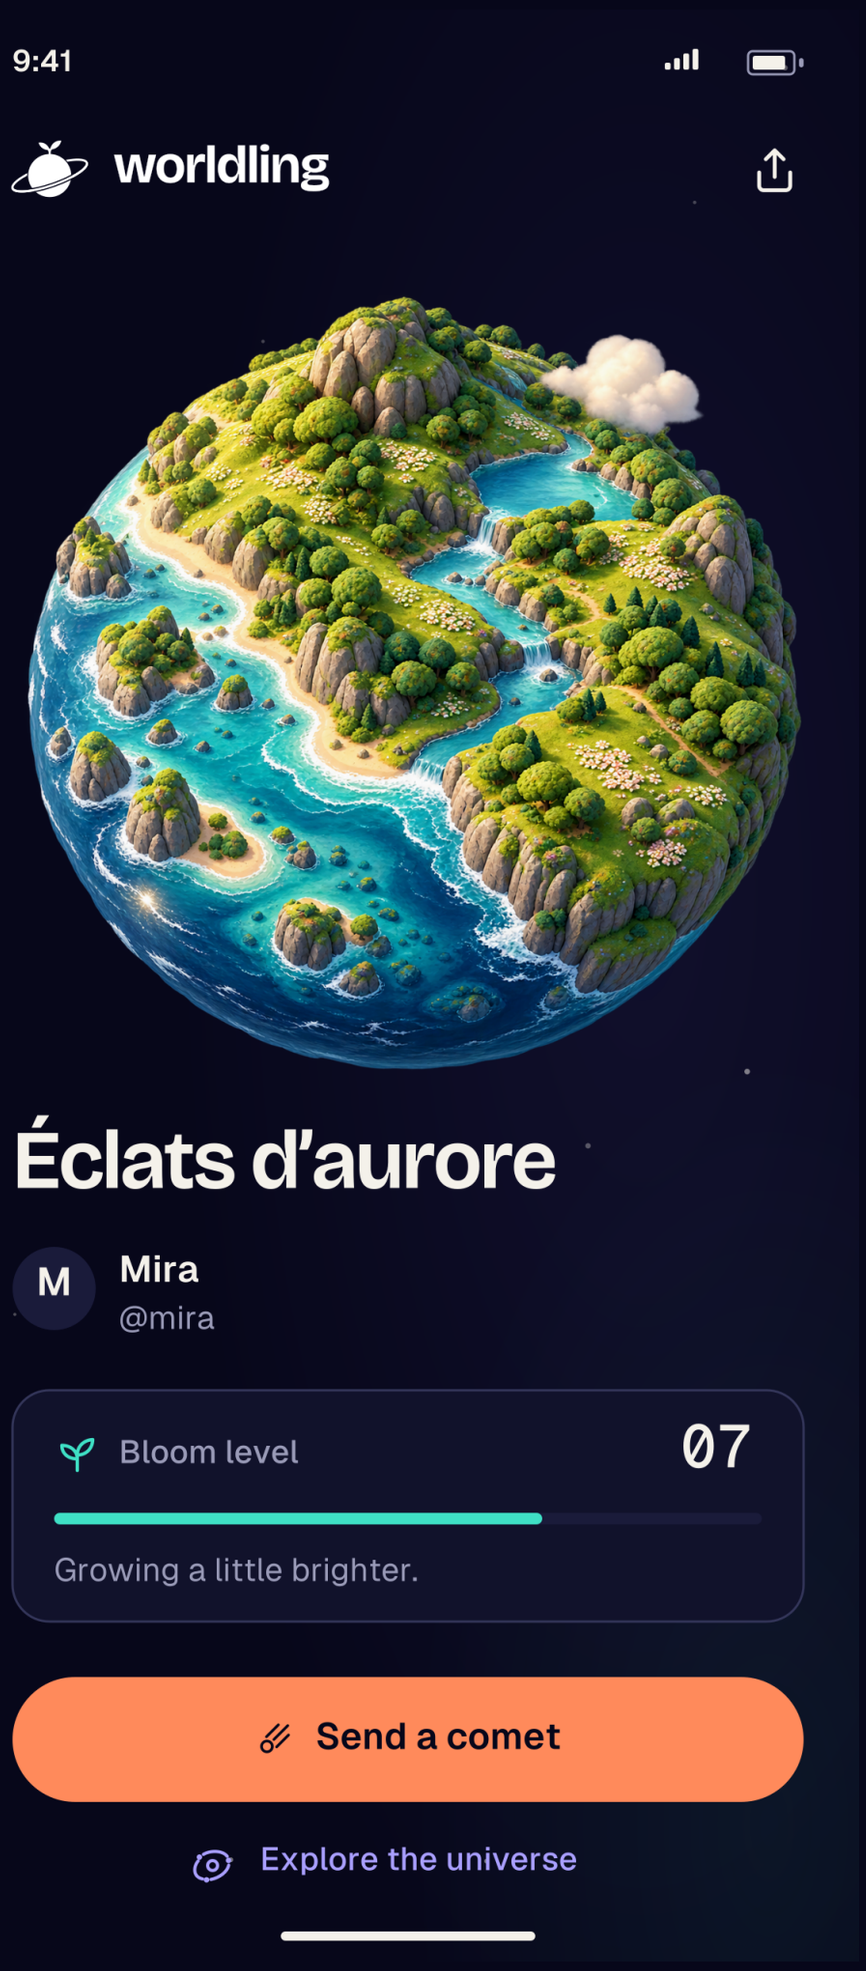

The story centers the invitation and reserves generous space above and below the content.

The drawn call to action is part of the image. Add a destination using the publishing surface’s available link controls.

A world worth visiting.

The planet takes the first glance. Its owner, growth and a kind action follow naturally.

A living first impression

The painterly world fills the top of the page. The approved logo stays quiet in the navigation.

A person behind the planet

Éclats d’aurore belongs to Mira, shown with @mira. These are fictional demonstration details.

Growth, shown simply

The bloom card uses a separate mono value, a restrained Aurora progress line and a short supporting sentence.

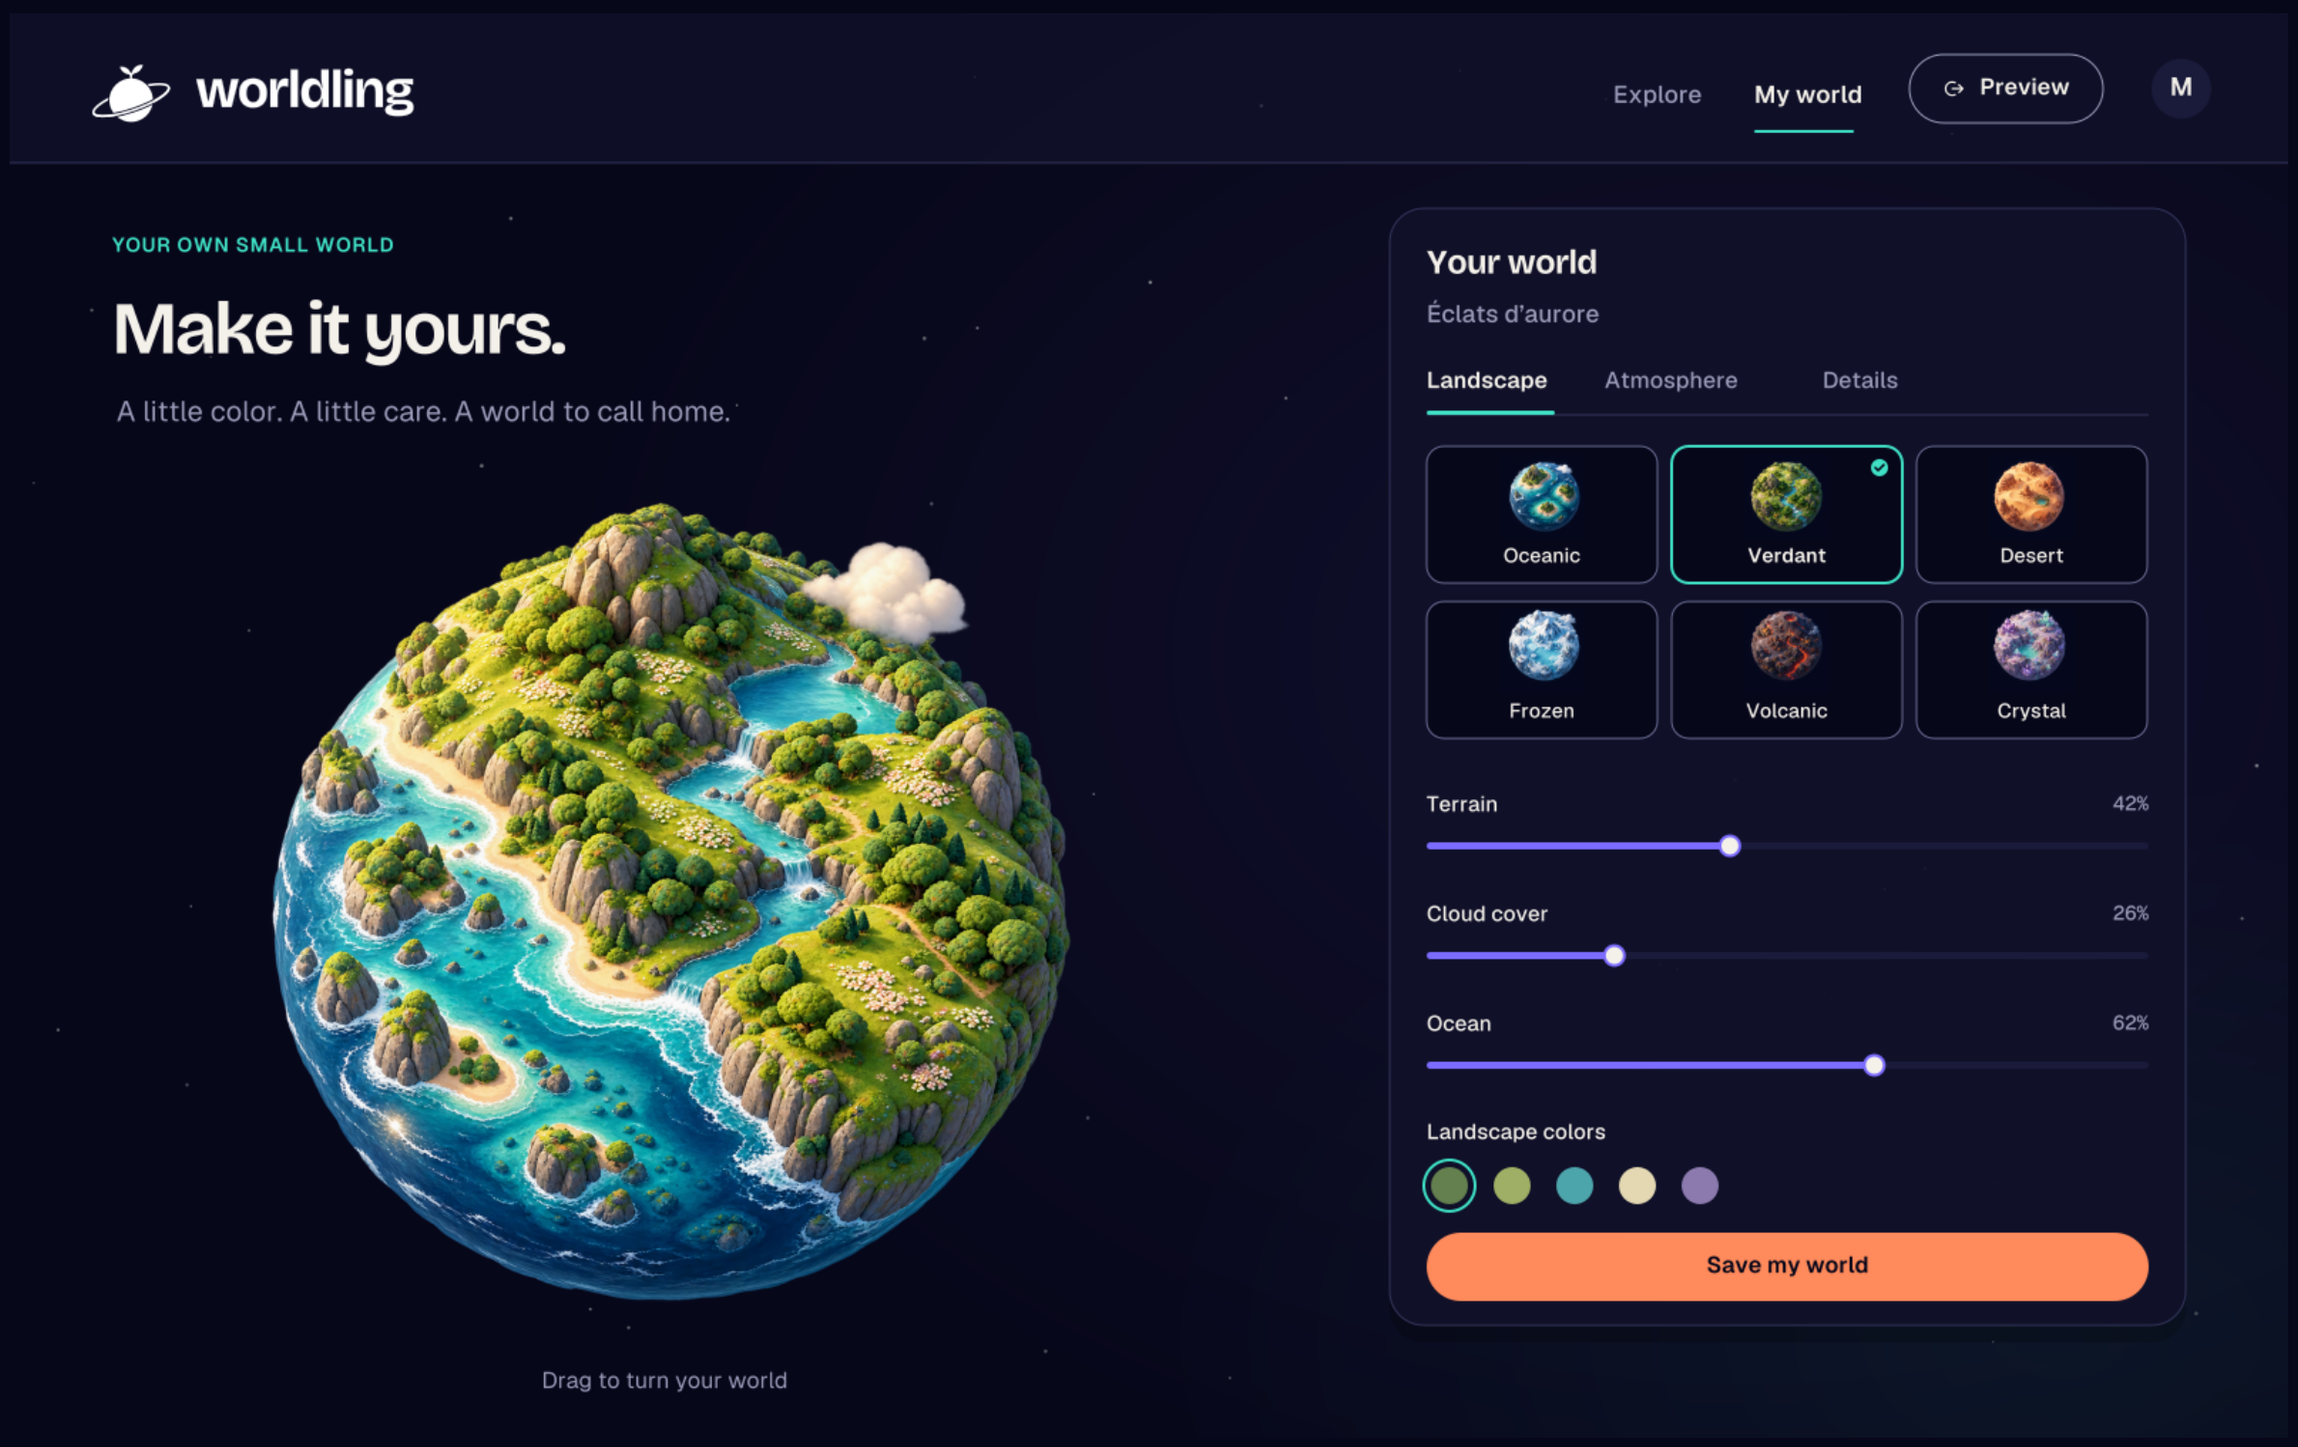

One warm action

Send a comet uses the Sunrise button. Explore the universe remains a quieter secondary path.

390 x 844 logical pixels / PNG at 3x

Room to make it yours.

A generous world preview sits beside a quiet control panel with familiar, visible choices.

A clear control panel

Six world presets come from the approved moodboard. Verdant is selected. Terrain, cloud cover, ocean and landscape colors give the panel a simple rhythm.

The world stays central

The full planet silhouette remains visible. Preview and Save my world support the creation flow. This is a static screen design.

1600 x 1000 pixels

A calm welcome, at any width.

Simple dark header and footer designs, supplied separately and in complete layout previews.
