Cozy cosmic, in color.

Deep navy gives every world room. Warm white, soft violet, living teal and a small touch of sunrise make it feel human.

Void	Deep Space	Orbit	Starlight
#07071A	#11122B	#1A1B3A	#F4F1EA

Dust	Nebula	Aurora	Sunrise
#9A9BB8	#7C6CFF	#3FE0C5	#FF8A5B

70 / 20 / 10

70% dark surfaces. 20% neutral text and icons. 10% brand accents. Treat this as a guide to visual emphasis, with room for each planet to have its own colors.

The original eight HEX values stay intact. The new support colors solve specific needs: readable links, clear control edges and recognizable status messages.

Use the approved Step 2 logo assets. This guide adds color rules without changing their geometry or core fills.

Exact values. Clear roles.

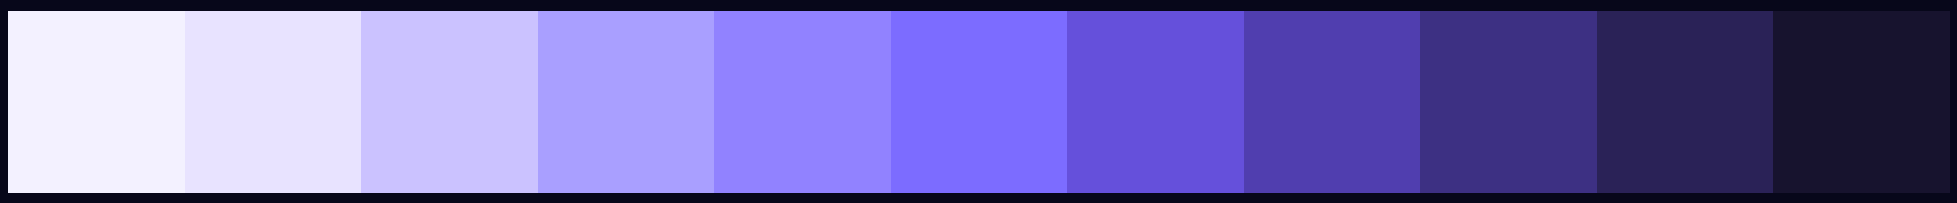
HEX and RGB are canonical sRGB. HSL is rounded to one decimal: hue in degrees, then saturation and lightness in percent.

COLOR / ROLE	HEX	RGB	H / S / L
Void Main canvas; ink on bright filled controls.	#07071A	7, 7, 26	240.0 / 57.6% / 6.5%
Deep Space Panels, cards, navigation and status containers.	#11122B	17, 18, 43	237.7 / 43.3% / 11.8%
Orbit Raised panels, menus and nested surfaces.	#1A1B3A	26, 27, 58	238.1 / 38.1% / 16.5%
Starlight Headings, body copy and primary icons on dark.	#F4F1EA	244, 241, 234	42.0 / 31.3% / 93.7%
Dust Secondary copy, metadata and supporting labels.	#9A9BB8	154, 155, 184	238.0 / 17.4% / 66.3%
Nebula Primary brand, selected controls and secondary actions.	#7C6CFF	124, 108, 255	246.5 / 100.0% / 71.2%
Aurora Growth details, bloom accents and focus color on dark.	#3FE0C5	63, 224, 197	169.9 / 72.2% / 56.3%
Sunrise Main call to action: create a world or send a comet.	#FF8A5B	255, 138, 91	17.2 / 100.0% / 67.8%
Nebula 300 Default link and selected-text color on dark surfaces.	#A99FFF	169, 159, 255	246.2 / 100.0% / 81.2%
Line Decorative separators only, never a required control boundary.	#34365A	52, 54, 90	236.8 / 26.8% / 27.8%
Control Line Visible input and control boundaries on dark surfaces.	#696C91	105, 108, 145	235.5 / 16.0% / 49.0%

Line is decorative. Control Line is the one to use when a border is needed to identify an input or control. Nebula 300 is the default link color on dark.

Nebula / 50 to 950

The original brand anchor stays at 500. Scale numbers are relative to this family, not equal perceived brightness across different families.



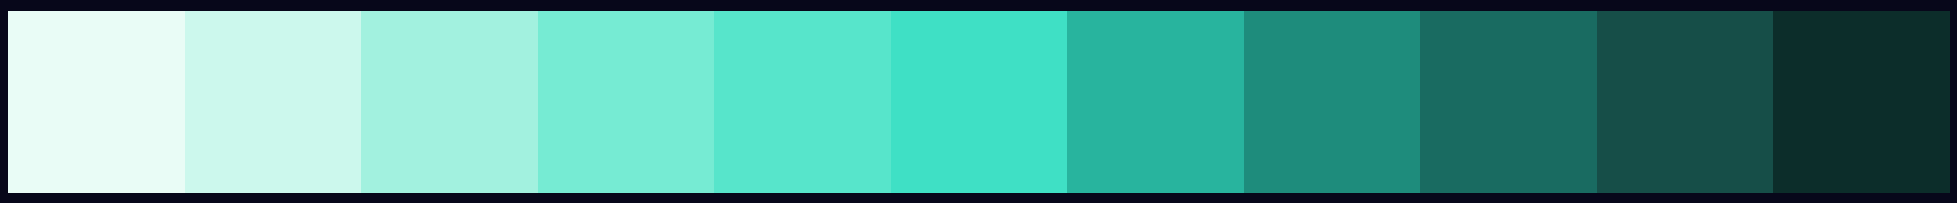
STEP	HEX	RGB	H / S / L	ON VOID
50	#F3F1FF	243, 241, 255	248.6 / 100.0% / 97.3%	17.87:1
100	#E8E3FF	232, 227, 255	250.7 / 100.0% / 94.5%	15.99:1
200	#CBC2FF	203, 194, 255	248.9 / 100.0% / 88.0%	12.05:1
300	#A99FFF	169, 159, 255	246.2 / 100.0% / 81.2%	8.62:1
400	#9182FF	145, 130, 255	247.2 / 100.0% / 75.5%	6.49:1
500	#7C6CFF	124, 108, 255	246.5 / 100.0% / 71.2%	5.17:1
600	#6550DB	101, 80, 219	249.1 / 65.9% / 58.6%	3.53:1
700	#503EAF	80, 62, 175	249.6 / 47.7% / 46.5%	2.51:1
800	#3D3083	61, 48, 131	249.4 / 46.4% / 35.1%	1.85:1
900	#2A2257	42, 34, 87	249.1 / 43.8% / 23.7%	1.39:1
950	#17132E	23, 19, 46	248.9 / 41.5% / 12.7%	1.11:1

Hold 500 for the brand anchor and filled actions. Use 300 for links and selected text on dark. On Starlight, use 700 for small links.

The full matrix includes all 11 shades against Void, Deep Space, Orbit and Starlight. A shade number is not an accessibility rating.

Aurora / 50 to 950

The original brand anchor stays at 500. Scale numbers are relative to this family, not equal perceived brightness across different families.



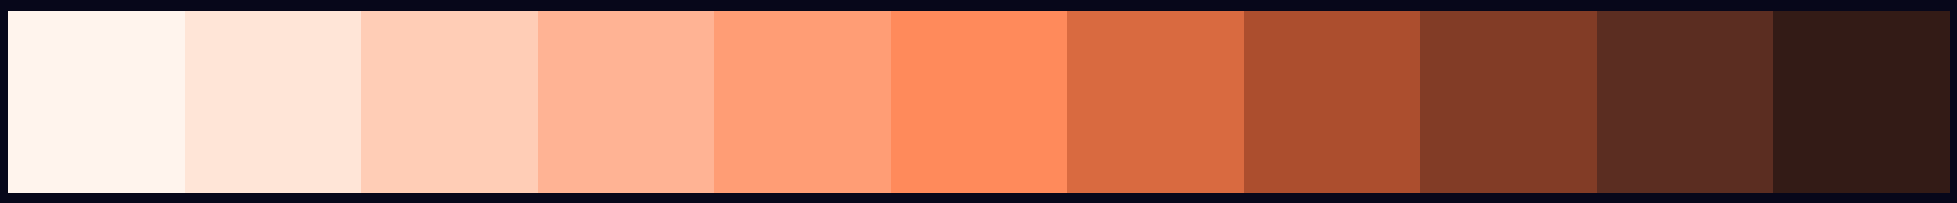
STEP	HEX	RGB	H / S / L	ON VOID
50	#E9FCF6	233, 252, 246	161.1 / 76.0% / 95.1%	18.70:1
100	#CCF8ED	204, 248, 237	165.0 / 75.9% / 88.6%	17.28:1
200	#A2F1DF	162, 241, 223	166.3 / 73.8% / 79.0%	15.35:1
300	#76EBD3	118, 235, 211	167.7 / 74.5% / 69.2%	13.84:1
400	#57E5CB	87, 229, 203	169.0 / 73.2% / 62.0%	12.78:1
500	#3FE0C5	63, 224, 197	169.9 / 72.2% / 56.3%	12.03:1
600	#28B49E	40, 180, 158	170.6 / 63.6% / 43.1%	7.69:1
700	#1E8C7C	30, 140, 124	171.3 / 64.7% / 33.3%	4.83:1
800	#196B61	25, 107, 97	172.7 / 62.1% / 25.9%	3.15:1
900	#164E48	22, 78, 72	173.6 / 56.0% / 19.6%	2.10:1
950	#0C2D2A	12, 45, 42	174.5 / 57.9% / 11.2%	1.35:1

Use 500 for growth accents and focus color on dark. Keep it small and deliberate. Darker scale values are useful for decoration and tinted surfaces, not automatically for readable labels.

The full matrix includes all 11 shades against Void, Deep Space, Orbit and Starlight. A shade number is not an accessibility rating.

Sunrise / 50 to 950

The original brand anchor stays at 500. Scale numbers are relative to this family, not equal perceived brightness across different families.



STEP	HEX	RGB	H / S / L	ON VOID
50	#FFF4ED	255, 244, 237	23.3 / 100.0% / 96.5%	18.41:1
100	#FFE5D7	255, 229, 215	21.0 / 100.0% / 92.2%	16.54:1
200	#FFCDB6	255, 205, 182	18.9 / 100.0% / 85.7%	13.90:1
300	#FFB394	255, 179, 148	17.4 / 100.0% / 79.0%	11.50:1
400	#FF9D75	255, 157, 117	17.4 / 100.0% / 72.9%	9.80:1
500	#FF8A5B	255, 138, 91	17.2 / 100.0% / 67.8%	8.57:1
600	#D96A40	217, 106, 64	16.5 / 66.8% / 55.1%	5.77:1
700	#AC4E2E	172, 78, 46	15.2 / 57.8% / 42.7%	3.68:1
800	#823C26	130, 60, 38	14.3 / 54.8% / 32.9%	2.49:1
900	#5B2D21	91, 45, 33	12.4 / 46.8% / 24.3%	1.75:1
950	#331B16	51, 27, 22	10.3 / 39.7% / 14.3%	1.24:1

Use 500 for the main call to action, 400 on hover and 600 when pressed. Keep Void text across these states: 8.57:1, 9.80:1 and 5.77:1 respectively.

The full matrix includes all 11 shades against Void, Deep Space, Orbit and Starlight. A shade number is not an accessibility rating.

Status, with a softer voice.

Use a visible label and an icon with every status. Color reinforces the meaning; it does not carry the message alone.

Success

#68DFA9

RGB 104, 223, 169

HSL 152.8 / 65.0% / 64.1%

Saved, delivered, completed or a healthy system state.

Surface #1B2B3A

Label on surface: 8.75:1

Warning

#F4C969

RGB 244, 201, 105

HSL 41.4 / 86.3% / 68.4%

Needs attention; a recoverable limit or unsaved change.

Surface #2C2832

Label on surface: 9.20:1

Danger

#FF7B91

RGB 255, 123, 145

HSL 350.0 / 100.0% / 74.1%

Failed action, destructive action or an error that needs repair.

Surface #2E1F37

Label on surface: 6.21:1

Info

#8AB4FF

RGB 138, 180, 255

HSL 218.5 / 100.0% / 77.1%

Neutral guidance, updates and helpful status information.

Surface #202544

Label on surface: 7.13:1

Message backgrounds are opaque HEX values precomposed from 12% semantic color over Deep Space. Do not apply another opacity. Exact RGB/HSL for these backgrounds is in the Markdown guide and JSON.

Choose the pair, not just the color.

WCAG 2.2 thresholds: normal text AA 4.5:1 and AAA 7:1; large text AA 3:1 and AAA 4.5:1. Decisions use unrounded ratios. [1][2]

		NORMAL		LARGE	
FOREGROUND / BACKGROUND	RATIO	AA	AAA	AA	AAA
Starlight / Void	17.66:1	Pass	Pass	Pass	Pass
Starlight / Deep Space	16.26:1	Pass	Pass	Pass	Pass
Starlight / Orbit	14.75:1	Pass	Pass	Pass	Pass
Dust / Void	7.35:1	Pass	Pass	Pass	Pass
Dust / Deep Space	6.77:1	Pass	Fail	Pass	Pass
Dust / Orbit	6.15:1	Pass	Fail	Pass	Pass
Nebula / Void	5.17:1	Pass	Fail	Pass	Pass
Nebula / Deep Space	4.76:1	Pass	Fail	Pass	Pass
Nebula / Orbit	4.32:1	Fail	Fail	Pass	Fail
Nebula 300 / Void	8.62:1	Pass	Pass	Pass	Pass
Nebula 300 / Deep Space	7.94:1	Pass	Pass	Pass	Pass
Nebula 300 / Orbit	7.20:1	Pass	Pass	Pass	Pass
Aurora / Void	12.03:1	Pass	Pass	Pass	Pass
Sunrise / Void	8.57:1	Pass	Pass	Pass	Pass
Void / Nebula	5.17:1	Pass	Fail	Pass	Pass
Starlight / Nebula	3.42:1	Fail	Fail	Pass	Fail
Void / Aurora	12.03:1	Pass	Pass	Pass	Pass
Starlight / Aurora	1.47:1	Fail	Fail	Fail	Fail
Void / Sunrise	8.57:1	Pass	Pass	Pass	Pass
Starlight / Sunrise	2.06:1	Fail	Fail	Fail	Fail
Void / Starlight	17.66:1	Pass	Pass	Pass	Pass
Dust / Starlight	2.40:1	Fail	Fail	Fail	Fail
Nebula / Starlight	3.42:1	Fail	Fail	Pass	Fail
Nebula 700 / Starlight	7.03:1	Pass	Pass	Pass	Pass
Void / Sunrise 400	9.80:1	Pass	Pass	Pass	Pass
Void / Sunrise 600	5.77:1	Pass	Fail	Pass	Pass
Void / Nebula 600	3.53:1	Fail	Fail	Pass	Fail

Large text: at least 24 CSS px regular, or 14pt bold (about 18.67 CSS px). These opaque color pairs do not establish whole-app conformance. Recheck text over transparency, art and motion.

Keep the important edges visible.

The status table rates normal-size text. Required control boundaries and state indicators need 3:1 against adjacent colors. [3]

STATUS / BACKGROUND	RATIO	AA	AAA
Success / Void	12.06:1	Pass	Pass
Success / Deep Space	11.10:1	Pass	Pass
Success / Orbit	10.08:1	Pass	Pass
Success / Success surface	8.75:1	Pass	Pass
Warning / Void	12.71:1	Pass	Pass
Warning / Deep Space	11.71:1	Pass	Pass
Warning / Orbit	10.62:1	Pass	Pass
Warning / Warning surface	9.20:1	Pass	Pass
Danger / Void	8.06:1	Pass	Pass
Danger / Deep Space	7.42:1	Pass	Pass
Danger / Orbit	6.73:1	Pass	Fail
Danger / Danger surface	6.21:1	Pass	Fail
Info / Void	9.54:1	Pass	Pass
Info / Deep Space	8.78:1	Pass	Pass
Info / Orbit	7.97:1	Pass	Pass
Info / Info surface	7.13:1	Pass	Pass

BOUNDARIES / ALL THREE DARK SURFACES

Line	1.73:1 / 1.59:1 / 1.44:1	Decorative only
Control Line	3.94:1 / 3.63:1 / 3.29:1	Pass 3:1
Aurora	12.03:1 / 11.07:1 / 10.05:1	Pass 3:1
Nebula	5.17:1 / 4.76:1 / 4.32:1	Pass 3:1

Ratios above are ordered Void / Deep Space / Orbit. The full per-pair table is in the Markdown reference. Control Line defines functional edges; Line only adds decoration.

A status label, shape or icon must still identify the meaning. Never rely on red, amber, green or blue alone.

Mostly quiet. A little wonder.

Give most of the screen to the worlds and the dark canvas. Save the warmest accent for the action that matters most.

70% Dark surfaces

Void 50 / Deep Space 15 / Orbit 5

20% Neutral content

Starlight 15 / Dust 5

10% Brand accents

Nebula 5 / Aurora 3 / Sunrise 2

Ratios guide visual emphasis, not exact pixels. Planet artwork has its own colors. Status colors replace a little of the accent allowance instead of adding visual noise.

SIGNATURE GRADIENT

Nebula #7C6CFF to Aurora #3FE0C5. Use it sparingly for a hero mark or short decorative accent. Keep normal body copy and the main CTA label on a tested solid fill. The hero logo retains its Step 2 gradient coordinates.

For light-background brand material, use Void text and Nebula 700 links on Starlight. This is a supporting treatment, not a full light-mode interface specification.

SOURCES AND METHOD

[1] WCAG 2.2 contrast minimum, SC 1.4.3

[2] WCAG 2.2 contrast enhanced, SC 1.4.6

[3] WCAG 2.2 non-text contrast, SC 1.4.11

[4] WCAG 2.2 relative luminance definition

All ratios use the WCAG sRGB luminance formula. The source code, complete tables and machine-readable color data are included.
